REVIEW AND APPROVAL STATEMENT

USAFETAC/PR-88/002, Corrosion Control Climatology, October 1988, has been reviewed and is approved for public release. There is no objection to unlimited distribution of this document to the public at large, or by the Defense Technical Information Center (DTIC) to the National Technical Information Service (NTIS).

PREFACE

This report documents work on Project 80343, which was completed by the USAF Environmental Technical Applications Center's Engineering Meteorology Section (USAFETAC/ECE) for Battelle-Columbus Division, 505 King Avenue, Columbus, Ohio 43201-2693. Battelle was under USAF contract to perform a study of USAF paint facility and corrosion prevention and control facility requirements. USAF contact for the Battelle study was Mr David F. Ellicks, WR-ALC/MMEA, Robins AFB, GA 31098-5609.

The report consists of tables (for 183 selected locations) that give the mean number of days with:

- A Temperature less than or equal to 40°F at noon LST
- B Precipitation greater than a trace
- C Temperature greater than $85^{\circ}F$ for 5 hours or more
- D Thunderstorms
- E Relative Humidity greater than 60% at noon LST
- F Wind greater than 15 Knots between 06-18 LST
- 6 Wind greater than 15 Knots--all hours

Mean number of days with:

- Temperature less than or equal to 40°F at noon LST Precipitation greater than a trace
- Temperature greater than 85°F for 5 hours or more
- Thunderstorms

- Mean number of days with:

 A Temperature less than or equal to 40°F at noon LST

 B Precipitation greater than a trace

 C Temperature greater than 85°F for 5 hours or more
- Thunderstorms
 E Relative Humidity greater than 60% at noon LST
 F Wind greater than 15 Knots between 06 & 18 LST
 G Wind greater than 15 Knots--all hours
 # = Less than 1/2 day
